(c)	NRS 069 NETWORK RECOVERY COST			
	A once-off network contribution for the electricity requested for subdivisions, new developers, consent users, scheme amendments or consumer upgrades (existing serviced erven where requested capacity is greater than the original designed or installed capacity). The after-diversified maximum demand (ADMD) for each erven is used in network designs for township development, scheme amendment and service connection upgrades.			
	(a) The ADMD has been determined by STATS SA Census 2011 municipal report which may be use for the following types of residential installations:

	4. Single residential medium or high income where the erf size is smaller than 500m2 - 7kVA			
	5. Single residential medium or high income where the erf size is greater than 500m2 - 9kVA			
	For very high residential three-phase connections or upgrade of existing single phase connection to three phase maybe assume that the ADMD for a three-phase connection is three (3) times that of a single phase connection.			
	(b) The after-diversified maximum demand (ADMD) or notified maximum demand (NMD) per erf for commercial and all non residential applications requested in writing by the owner or developer shall be calculated prior to the NMD as indicated on the application by the owner or developer with the approval from the Manager: Electro-Technical Engineer (Planning, Construction and Design). The NMD's of existing serviced erven are equal to the installed capacity or as per service agreement.			
	(c) Determining charges			
	The NRS069 network recovery cost is determined by the actual level at which the development connects to the supply system. The charge is calculated as follows:			
	R = Total network recovery cost payable in rand value			
	ADMD1 = Sum of new ADMD in kVA			
	ADMD2 = Sum of existing ADMD in KVA			
	NRC = Network recovery cost per level as indicated below			
	R = (ADMD1 - ADMD2) X NRC			
	(d) Network contributions			
	The "network recovery cost" charges must be as such to cover the capital liabilities incurred or to or to be incurred by the municipality in supplying the distribution and or increase the capacity to the premises or group of premises. The contributions per kVA at the different connection levels are as follows:

		Maximum levy/service: Market Value of Property=R240 000	10,791.00	10,035.00	7.53%
		- BICL'S are payable per unit for each service namely for water, sewerage, roads and stormwater			
		- Property value smaller than R120 000: No BICL's payable			
		- A pro rate levy is payable for units with a property value between R120 000 and R240 000			
		- Market value of property - Residential erven: Market value of erf			
		- Flats/group housing: etc Market value of unit			
2		Granny flats, second dwelling units and/or any further densification on a residential erf			
		- Bulk Infrastructure Contribution not applicable			
3		Redevelopment of existing business properties			
		- BICL's are payable on the additional equivalent units created			
		- The additional equivalent units are calculated by determining the additional water used divided by 0,75kl/d			
		- BICL's are payable per equivalent unit for all services as per subdivision tariff.			
4		Gap Housing			
	4.1	Developments within the GAP housing category only pay 40% of the applicable normal BICL			
	4.2	Gap housing category is any unit where the market value of the property (land and improvements) is less than or equal to R500 000			
	4.3	That an application for GAP housing be accompanied by a signed affidavit that states the purchase price, or market value, reflected is the full purchase amount, or market value, and that, in the instance of a purchase price being given, that no additional amount is payable by the purchaser to the seller at any stage that can in any way be interpreted to be part of the purchase price of the erf or dwelling unit.			
	4.4	That the Municipality may request information or proof or motivation from a developer/seller/buyer as to how the selling price or market value was determined. The municipality may request a formal valuation from a recognized property valuer, at the cost of the applicant			
5		The following conditions will apply:			
	5.1	The tariff will apply for private residential flats, group housing development and any subdivisions or densification that places an additional burden on the services.			
	5.2	The Bulk Service Levy excludes the cost of any link services for a development or densification. The developer/ owner is responsible for the total cost of any link services for the specific development.			
	5.3	If the developer is required to construct bulk infrastructure, the cost thereof can be off set against the Bulk Service Levy payable.			
	5.4	Developers be requested to provide bridging finance if council's funding are insufficient. The developers be refunded via methods acceptable to the Executive Director: Finance eg.: - Payment from the Bulk Infrastructure Fund (contributions from other developers) - The developer be credited with a equivalent erven Bulk Service Levy contribution for a future development. - Reduction on property tax payable			
	5.5	The Bulk Infrastructure Fund be used for the upgrading of bulk services linked to development and that the approval of ad hoc applications for bridging finance from this Fund be delegated to the Executive Director: Finance on recommendation of the Executive Manager: Engineering Services, subject to official budget adjustment.			
	5.6	Due date for BICL's payment: - Subdivision applications - on the date the transfer of erven are required - Any other application - on the date the building plans are approved - as per service level agreement if bulk service upgrading is required.			
	5.7	The above tariffs will be applied in terms of municipal policy, which may be amended from time to time, as well as general noted attached to any Water and Sewer System Analysis report by Council's Master Planning consultant			

DEVELOPMENT CONTRIBUTION SUMMARY

All Land Use applications submitted to the Municipality for approval from 1 February 2016 will be liable to pay a Developers Contribution as per Drakensteins' by-law on Municipal Land Use Planning of 2015.

1. A Development Contribution is a once-off charge imposed by the Municipality on a developer as a condition of approval of a land development application in order to cover the cost of the bulk engineering services required as a result of an intensification of land use.
2. Development Contributions are payable on the following services:
 - Water
 - Sewer
 - Roads
 - Stormwater
 - Solid Waste
3. Electricity Services has to abide to the NRS 069: Code of Practice for the Recovery of Capital Costs for Distribution Network Assets.
4. Development Contributions are applicable to all types of developments. (Low Cost Housing, GAP Housing, High Income Housing, Commercial, Retail, Educational, etc.
5. Development Contributions are calculated using the approved calculator using unit cost per service as the basis of the formulae. The unit cost are derived from:
 - Replacement value of the service
 - Grants for new infrastructure
 - Outstanding loans for infrastructure
 - Existing consumption
 - Future consumption
6. The Drakenstein Municipality Unit costs for the Total Municipal Area for the 2017/2018 financial year are as follows:

• Water	-	R 16 992.00 / kL / day
• Sewer	-	R 29 537.00 / kL / day
• Stormwater	-	R 228 340.00 /c.ha
• Roads	-	R 14 807.00 / trips / peak hour
• Solid waste	-	R 87 716.00 / ton / week
7. Any subsidies and exemptions will be dealt with in accordance to an approved Policy.
8. Escalation will be done annually as per Construction Price Adjustment Formula(CPAF) per calendar year or when a Master Plan has been updated.
9. The escalation rate for the 2018/2019 financial year is 4.98%.
